## Technologies

---

**Proficient:** Javascript, Node.js, Express.js, React.js, Redux.js, Sequelize, Axios, Git, HTML, CSS, PostgreSQL, React Native, Firebase, Google Vision

**Familiar:** Material UI, Figma, Webpack, Mocha, Chai, Jasmine, Phaser

## Projects

---

**Super Like** | Developer | <https://bit.ly/2ZtdD1o>

*Built an E-commerce website in a dynamic agile team environment*

- Used Sequelize, Express, PostgreSQL as the backend and React, Redux as the frontend to create a functional E-commerce website
- Worked on cart component being able to add/edit and checkout
- Protected our routes to prevent malicious intent from a user -- making sure APIs are protected and allowing appropriate users to be able to do specific commands

**MTALens** | Developer | <https://bit.ly/2L7GrU0>

*Looking up the next upcoming trains using Google Vision to capture the train line with functionalities similar to Waze but for trains*

- Used Firebase realtime database as the backend along with Google Vision to grab the letter to feed into the MTA GTFS API to get realtime data with React Native and Expo as the front end.
- Worked on accessing the expo camera that connected to Google Vision seamlessly
- Had a heavy hand on the UI and user experience to provide consistent styling throughout the app

## Experience

---

Volunteer Income Tax Assistance Program, Queens - *Intern*

January 2018 - March 2018
